

JavaScript Production Practice Roadmap

1. **trim()** — Validate and clean username
2. **split()** — Parse CSV string
3. **slice()** — Mask credit card digits
4. **replace()/replaceAll()** — Normalize phone number
5. **includes()** — Blocked word filter
6. **startsWith()/endsWith()** — Validate file extension
7. **toLowerCase()/toUpperCase()** — Case-insensitive login
8. **map()** — Format product names
9. **filter()** — Keep active users
10. **reduce()** — Shopping cart total
11. **find()** — Find user by ID
12. **some()** — Check admin exists
13. **every()** — Validate all fields filled
14. **sort()** — Sort leaderboard
15. **push()/pop()** — Undo stack
16. **shift()/unshift()** — Queue simulation
17. **Object.keys()** — Count object properties
18. **Object.values()** — Average marks
19. **Object.entries()** — Object to array
20. **forEach()** — Print order summary
21. **Set** — Remove duplicates
22. **Map** — Word frequency
23. **Destructuring** — Extract API response
24. **Spread Operator** — Merge settings
25. **Rest Parameters** — Sum unlimited numbers
26. **Optional Chaining** — Safe nested access
27. **Nullish Coalescing** — Default values
28. **Array.from()** — Convert NodeList
29. **JSON.parse()/stringify()** — Store settings
30. **Date** — Days until event
31. **Math** — Random OTP
32. **Promise** — Fetch simulation
33. **async/await** — API call handling
